Product Name: 403 Forbidden

When it comes to hot liquid road marking equipment, the Thermoplastic Road Marking Machine stands out as a top choice. This advanced machine is designed to efficiently and accurately create thermoplastic traffic line markings on various road surfaces. It operates by melting plastic materials to create molten plastic road markings that are highly durable and long-lasting.

The Thermoplastic Road Marking Machine is a reliable and efficient solution for road marking professionals looking to enhance traffic safety and organization. With its innovative technology and precise application capabilities, this machine ensures that road markings are clear, visible, and resistant to wear and tear.

Key features of the Thermoplastic Road Marking Machine include:

- High-quality construction: The machine is built to withstand the rigors of daily use and is constructed with durable materials that ensure long-term performance.
- User-friendly design: With easy-to-use controls and intuitive operation, this machine is suitable for both experienced professionals and beginners in the road marking industry.
- Versatile application: The machine can be used on various road surfaces, including asphalt, concrete, and other commonly used materials.
- Efficient melting system: The thermoplastic material is melted quickly and evenly, ensuring smooth and consistent road markings.
- Adjustable settings: Operators can customize the width, thickness, and other parameters of the road markings to meet specific project requirements.

Whether you are marking highways, parking lots, airports, or other areas, the Thermoplastic Road Marking Machine offers the precision and reliability you need to complete the job with exceptional results. Its advanced technology and user-friendly features make it a valuable asset for any road marking project.

Overall, the Thermoplastic Road Marking Machine is a superior choice for professionals seeking a high-performance and dependable solution for creating thermoplastic traffic line markings. Its ability to efficiently melt plastic materials and apply durable road markings makes it a must-have tool for anyone in the road marking industry.

Status Code	403

Applications:

Product Application Occasions and Scenarios for the **WAGE HG-VM Thermoplastic Road Marking Machine** :

The **WAGE HG-VM Thermoplastic Road Marking Machine** is a versatile and efficient piece of equipment designed for various road marking applications. Its durability, reliability, and ease of use make it suitable for a wide range of scenarios. Some of the key application occasions include:

Road Construction Projects: The **WAGE HG-VM** is ideal for use in road construction projects where hot liquid road marking equipment is required. Its precise application of thermoplastic road paint ensures clear and durable road markings.

Parking Lots: Whether in commercial parking lots or public parking areas, the **WAGE HG-VM** can efficiently mark parking spaces, directional arrows, and other necessary markings with ease.

Airport Runways: The **WAGE HG-VM** is well-suited for marking airport runways and taxiways, thanks to its ability to apply molten plastic road markings accurately and quickly.

Industrial Facilities: Industrial complexes and warehouses often require clear floor markings for safety and organization. The **WAGE HG-VM** can handle these tasks effectively.

Sports Courts: From tennis courts to basketball courts, the **WAGE HG-VM** can be used to mark various sports courts with precision and durability.

With a **Minimum Order Quantity** of 1 set and a price range of 6200 to 9250 USD, the **WAGE HG-VM** offers flexibility for different budget requirements. Payment terms include T/T, Western Union, MoneyGram, and L/C, making it convenient for customers. The **Supply**

Ability of 10 sets per week and a **Delivery Time** of 1 to 3 weeks ensure timely fulfillment of orders. The machine is packaged securely in a box for safe transportation.

The **WAGE HG-VM Thermoplastic Road Marking Machine** is certified with EMS and OHSMS standards, ensuring high quality and safety. Its efficient performance and user-friendly design make it a reliable choice for road marking professionals.

Support and Services:

The Thermoplastic Road Marking Machine product comes with comprehensive Product Technical Support and Services to ensure smooth operation and maintenance. Our technical support team is available to provide guidance on machine setup, troubleshooting, and general operation. Additionally, we offer services such as on-site training, maintenance agreements, and spare parts availability to keep your machine running efficiently.

Packing and Shipping:

Product Packaging:

The Thermoplastic Road Marking Machine is carefully packaged in a sturdy cardboard box to ensure safe transportation. The machine is secured with foam padding and protective materials to prevent any damage during shipping.

Shipping Information:

Once your order is confirmed, the Thermoplastic Road Marking Machine will be shipped within 2 business days. We use reliable shipping services to deliver your product in a timely manner. You will receive a tracking number to monitor the status of your shipment.

FAQ:

Q: What is the brand name of this Thermoplastic Road Marking Machine?

A: The brand name is WAGE.

Q: What is the model number of this Thermoplastic Road Marking Machine?

A: The model number is HG-VM.

Q: Where is this Thermoplastic Road Marking Machine manufactured?

A: It is made in China.

Q: What are the accepted payment terms for purchasing this Thermoplastic Road Marking Machine?

A: The accepted payment terms are T/T, Western Union, MoneyGram, and L/C.

Q: What is the minimum order quantity for this Thermoplastic Road Marking Machine?

A: The minimum order quantity is 1 set.
